NOIDA INSTITUTE OF ENGINEERING AND TECHNOLOGY, GREATER NOIDA

(An Autonomous Institute Affiliated to AKTU, Lucknow)

B.Tech

SEM: V - THEORY EXAMINATION (2024 - 2025)

Subject: Cyber Security Essentials

Time: 3 Hours

Max. Marks: 100

General Instructions:*IMP: Verify that you have received the question paper with the correct course, code, branch etc.**1. This Question paper comprises of three Sections -A, B, & C. It consists of Multiple Choice Questions (MCQ's) & Subjective type questions.**2. Maximum marks for each question are indicated on right -hand side of each question.**3. Illustrate your answers with neat sketches wherever necessary.**4. Assume suitable data if necessary.**5. Preferably, write the answers in sequential order.**6. No sheet should be left blank. Any written material after a blank sheet will not be evaluated/checked.***SECTION-A**

20

1. Attempt all parts:-

- 1-a. What does two-factor authentication (2FA) enhance? (CO1,K1) 1
- (a) Encryption strength
 - (b) Data Backup Processes
 - (c) User authentication security
 - (d) Firewall Efficiency
- 1-b. Which attack method is commonly used to compromise routers? (CO1,K1) 1
- (a) DNS hijacking
 - (b) SQL Injection
 - (c) Credential stuffing
 - (d) Code obfuscation
- 1-c. Algorithm encrypting data for secure VPN communication. (CO2,K1) 1
- (a) RSA
 - (b) MD5
 - (c) SHA-1
 - (d) AES
- 1-d. VPN type offering secure connections for remote users. (CO2,K1) 1
- (a) Remote Access VPN
 - (b) Site-to-Site VPN
 - (c) Personal VPN

- (d) Local Area Network VPN
- 1-e. Analysis process for determining an attack's origin in a network (CO3,K2) 1
- (a) Security assessment
 - (b) Forensic analysis
 - (c) Risk management
 - (d) Network configuration
- 1-f. Encryption standard used for wireless networks (CO3,K1) 1
- (a) AES
 - (b) SHA
 - (c) MD5
 - (d) DES
- 1-g. Tool used in Kali Linux for network penetration testing is:(CO4,K2) 1
- (a) Nmap
 - (b) Metasploit
 - (c) Aircrack-ng
 - (d) Nessus
- 1-h. Network security technique where an encrypted tunnel is created over an insecure network is:(CO4,K1) 1
- (a) ACLs
 - (b) VLANs
 - (c) VPN
 - (d) SSL/TLS
- 1-i. In a dictionary attack, which method is used?(CO5,K1) 1
- (a) Trying words from a list
 - (b) Guessing by brute force
 - (c) Using complex algorithms
 - (d) Analyzing password hashes
- 1-j. Which of these is a common sign of password theft?(CO5,K2) 1
- (a) Changing password regularly
 - (b) Unauthorized account access
 - (c) Changing security settings
 - (d) Using encrypted passwords

2. Attempt all parts:-

- 2.a. What are the common vulnerabilities exploited by attackers in social engineering attacks?(CO1,K1) 2
- 2.b. Mention two advantages of using OpenVPN compared to traditional VPNs.(CO2,K2) 2
- 2.c. Differentiate between TCP and UDP traffic in protocol analysis.(CO3,K1) 2

- 2.d. State the function of Access Control Lists (ACLs) at the network layer.(CO4,K1) 2
- 2.e. Why is password reuse a bad practice?(CO5,K2) 2

SECTION-B

30

3. Answer any five of the following:-

- 3-a. How do spear phishing attacks differ from regular phishing?(CO1,K2) 6
- 3-b. Describe common attacks targeting smartphones and how to mitigate them.(CO1,K1) 6
- 3-c. How does OpenVPN utilize both symmetric and asymmetric encryption for secure communication?(CO2,K2) 6
- 3-d. What are the security challenges associated with VPNs, and how does OpenVPN address them?(CO2,K1) 6
- 3.e. Discuss the process of automating Wireshark scripts for incident response.(CO3,K3) 6
- 3.f. Explain how firewalls contribute to network security at the network layer.(CO4,K2) 6
- 3.g. Discuss the limitations of John the Ripper in cracking complex passwords.(CO5,K2) 6

SECTION-C

50

4. Answer any one of the following:-

- 4-a. What are the emerging threats in cybersecurity post-pandemic?(CO1,K2) 10
- 4-b. Differentiate between IoT attacks and cloud based attacks.(CO1,K1) 10

5. Answer any one of the following:-

- 5-a. Explain the different types of VPNs and their applications in detail.(CO2,K1) 10
- 5-b. Describe the tunneling process in VPNs and its importance for data protection.(CO2,K2) 10

6. Answer any one of the following:-

- 6-a. Explore the tools and techniques used in preserving and analyzing digital evidence in an incident.(CO3,K2) 10
- 6-b. Design a Wireshark script for detecting specific types of network anomalies in real-time.(CO3,K3) 10

7. Answer any one of the following:-

- 7-a. Examine how Access Control Lists (ACLs) control traffic flow and enhance security at the Network layer.(CO4,K2) 10
- 7-b. Discuss how encryption standards such as SSL/TLS provide end-to-end security for online transactions.(CO4,K3) 10

8. Answer any one of the following:-

- 8-a. Explain the significance of salting in password hashing with examples. Describe how it prevents specific types of attacks.(CO5,K2) 10
- 8-b. Compare and contrast brute-force, dictionary, and hybrid password cracking 10

techniques. Highlight their effectiveness and countermeasures.(CO5,K2)
