| NOIDA INSTITUTE OF ENGINEERING AND TECHNOLOGY, GREATER NOIDA (An Autonomous Institute Affiliated to AKTU, Lucknow) B. Tech SEM: IV - THEORY EXAMINATION (2023- 2024) Subject: Engineering Mathematics- IV Time: 3 Hours General Instructions: IMP: Verify that you have received the question paper with the correct course, code, branch etc. 1. This Question paper comprises of three Sections -A, B, & C. It consists of Multiple Choice Questions (MCQ's) & Subjective type questions. 2. Maximum marks for each question are indicated on right -hand side of each question. 3. Illustrate your answers with neat sketches wherever necessary. 4. Assume suitable data if necessary. 5. Preferably, write the answers in sequential order. 6. No sheet should be left blank. Any written material after a blank sheet will not be evaluated/checked. SECTION-A 1. Attempt all parts: 1-a. Analyze the following statements to be true: (CO1) (a) Correlation coefficient is the geometric mean between the regression coefficients. (b) If one of the regression coefficients is greater than unity, the other must be less than unity. (c) Arithmetic mean of regression coefficient is greater than the Correlation coefficient. (d) All of the above 1-b. Two line of regression are x+2y-5 = 0, x+y=3 then mean value of x and y are respectively. (CO1) (a) 4,7 (b) 1,2 (c) -1,-2 (d) None of these 1-c. While testing the significance of difference of two sample means in case of small a sample, then the degree of freedom is: (CO2) (a) a ₁ -1 (b) n ₁ + n ₂ - 2 (c) n ₂ -1 (d) n ₁ n ₂ -2 | Print | _ | Subject Code:- Roll. | 1-d. In ANOVA, when calculated value of F is greater than the tabulated value, then | 1-d. | | s greater than th | ne tabulated | value, the | n 1 |

| | th | ne null hypothesis is? (CO2) | |
|--------|-----|---|---|
| | (a) | Accepted | |
| | (b) | Rejected | |
| | (c) | There is a no significant difference between two sample means. | |
| | (d) | None of these | |
| 1-e. | | table with all possible value of a random variable and its corresponding robabilities is called (CO3) | 1 |
| | (a) | Probability mass function | |
| | (b) | Probability density function | |
| | (c) | Probability distribution | |
| | (d) | Cumulative distribution function | |
| 1-f. | T | he value of area under a Probability density function? (CO3) | 1 |
| | (a) | 0 | |
| | (b) | 1 | |
| | (c) | ∞ | |
| | (d) | 1/2 | |
| 1-g. | N | formal Distribution is applied for (CO4) | 1 |
| | (a) | Discrete random variable | |
| | (b) | Irregular random variable | |
| | (c) | Any random variable | |
| | (d) | Continuous random variable | |
| 1-h. | | a Poisson Distribution, if 'n' is the number of trials and 'p' is the probability of access, then the mean value is given by? (CO4) | 1 |
| | (a) | m = np | |
| | (b) | $m = (np)^2$ | |
| | (c) | m = np(1-p) | |
| | (d) | m = p | |
| 1-i. | ` , | unction $f(x)=x^3 \cos x$ is: (CO5) | 1 |
| | (a) | Odd function | |
| | (b) | Even function | |
| | (c) | Neither even nor odd | |
| | (d) | None of these | |
| 1-j. | T | he unit digit of 7^{73} is (CO5) | 1 |
| 3 | (a) | 1 | |
| | (b) | 9 | |
| | (c) | 7 | |
| | (d) | None of these | |
| 2. Att | , , | all parts:- | |

- 2.a. Prove that Correlation coefficient is the geometric mean between the regression coefficients. (CO1)
- 2.b. Write the Control Limits (UCL & LCL) for C chart. (CO2)
- 2.c. Define probability density function. (CO3)
- 2.d. Find the mean of Binomial distribution. (CO4)
- 2.e. Calculate the sum of first 10 perfect cubes? (CO5)

SECTION-B 30

6

6

6

- 3. Answer any five of the following:-
- Calculate mode for the following data: (CO1) 3-a. 5 9 6 8 10 11 12 13 f 5 2 8 12 14 14 15 11 13
- 3-b. Find the moment coefficient of Skewness for the following data: (CO1) 6 Class 0 - 1010-20 20-30 30-40 40-50 50-60 60-70 interval 12 20 30 15 10
- 3-c. In a blade manufacturing factory, 1000 blades are examined daily. Draw the np
 Chart for the following table and examine whether the process is under control?
 (CO2)

| Date | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|-------------------------------|---|----|----|---|---|----|----|----|----|----|----|----|----|----|----|
| No. of Defective Blades | 9 | 10 | 12 | 8 | 7 | 15 | 10 | 12 | 10 | 8 | 7 | 13 | 14 | 15 | 16 |

3-d. The following table gives the number of accidents that took place in an industry during various days of a week. Test if accidents are uniformly distributed over the week (CO2)

| Day | Mon | Tue | Wed | Thu | Fri | Sat |
|------------------|-----|-----|-----|-----|-----|-----|
| No. of accidents | 14 | 18 | 12 | 11 | 15 | 14 |

Given that tabular value of Chi-Square at 5% LOS for 5 degree of freedom is 11.09.

3.e. The joint probability density function of a two dimensional random variable (X, Y) is given by (CO3)

 $f(x,y) = \begin{cases} 2 & 0 < x < 1, 0 < y < x \\ 0 & \text{elsewhere} \end{cases}$

- i) find the conditional density function of Y given X=x and conditional density function of X given Y=y
- ii) check the independence of $\, X \,$ and $\, Y.$
- 3.f. A random variable X has an exponential distribution with probability distribution 6 function is given by $f(x) = \begin{cases} 5e^{-5x}, & \text{for } x > 0 \\ 0, & \text{otherwise} \end{cases}$ Find probability that X is not less than 2? (CO4)

| 3.g. | Find the unit digit of (4137) ⁷⁵⁴ . (CO5) |

SECTION-C

4-a.

4. Answer any <u>one</u> of the following:-

10

| x | 10 | 14 | 18 | 22 | 26 | 30 |
|---|----|----|----|----|----|----|
| у | 18 | 12 | 24 | 6 | 30 | 36 |

4-b. Find the multiple linear regressions of y on x and z from the data relating to three variables: (CO1)

Calculate the coefficient of correlation for the following data: (CO1)

10

| X | 7 | 12 | 17 | 20 |
|---|---|----|----|----|
| У | 4 | 7 | 9 | 12 |
| Z | 1 | 2 | 5 | 8 |

5. Answer any one of the following:-

5-a. The nicotine contents in two random samples of tobacco are given below: 10

Sample 1: 21 24 25 26 27

Sample 2: 22 27 28 30 31 36

Can you say that the two samples came from the same population? Given that the tabular value $F_{0.05} = 6.26$ for d.f. (5,4) and $t_{0.05} = 2.26$ for d.f. 9. (CO2)

5-b. Fit a binomial distribution for the following data and also test the goodness of fit.

10

x: 0 1 2 3 4 5 6

f: 5 18 28 12 7 6 4

Given that the tabular value of χ^2 for 2 degree of freedom is 5.99 at 5% LOS. (CO2)

6. Answer any one of the following:-

A two dimensional random variable (X,Y) have a bivariate distribution is given 6-a.

10

$$P(X = x, Y = y) = \frac{x^2 + y}{32}, x = 0, 1, 2, 3 \text{ and } y = 0, 1$$

Find the marginal distribution of X and Y and conditional distribution of X given Y=1. (CO3)

A continuous RV X has a probability distribution function $f(x) = kx^2e^{-x}$, $x \ge 0$ Find k, mean and variance $f(x) = kx^2e^{-x}$ 6-b.

7. Answer any one of the following:-

7-a. In 800 families with 5 children each, how many families would be expected to 10 have- (CO4)

I. 3 boys and 2 girls

II. 2 boys and 3 girls

III. No girl

IV. At most 2 girls. (Assume probabilities for boys and girls to be equal)

7-b. Fit a Poisson distribution to the set of observations:(CO4)

10

| X | 0 | 1 | 2 | 3 | 4 |
|------|-----|----|----|---|---|
| f(x) | 122 | 60 | 15 | 2 | 1 |

8. Answer any one of the following:-

8-a. Tickets numbered 1 to 20 are mixed up and then a ticket is drawn at random. What 10 is the probability that the ticket drawn has a number which is a multiple of 3 or 5? (CO5)

8-b. Calculate the number of zeros at the end of the product $5^5 \times 10^{10} \times 15^{15} \times \dots \times 10^{10} \times 15^{125}$? (CO5)

COR.
