MBA SECOND YEAR

Course Code	AMBA0359	L	T	P		Credit
Course Title	Summer Internship Project	0	0	4		2
Course objective: Objective of this project is to:					Contact Hours: 10	
1	Assess interest and abilities in their field of Study.					
2	Develop work habits and attitudes necessary for job success.					
3	Demonstrate an understanding of professional and ethical practice.					
4	Develop analytical skills including the ability to understand information and interpret data.					
5	Develop interpersonal skills which will enable them to build professional relationships, work within a team structure and to manage conflict in the workplace.					

Guidelines:

1. At the end of second semester examination, it is mandatory for every student of MBA to undergo on-the-job practical training in any manufacturing, service or financial organization. The training will be of 6 to 8 weeks duration. The student is expected to undergo a compulsory training for the mentioned period.
2. During the training, the student is expected to learn about the organization and analyze and suggest solutions of a live problem. The objective is to equip the student with the knowledge of actual functioning of the organization and problems faced by them for exploring feasible suggestions.
3. During the course of training, the organization (where the student is undergoing training) will assign a problem/project to the student.
4. The student, after the completion of training will submit a report to the College/Institute which will form part of third semester examination.
5. The report (based on training/the problem/project studied) prepared by the student will be known as Summer Internship Project. The report should ordinarily be based on primary data. It should reflect in depth study of micro problem, ordinarily assigned by the organization where student undergoes training. Relevant tables and bibliography should support it. One comprehensive chapter must be included about the organization where the student has undergone training. This should deal with brief history of the organization, its structure, performance products/services and problem faced. This chapter will form part 1 of the report. Part 2 of the report will contain the study of micro research problem. The average size of report ordinarily will be of minimum 40-60 pages in standard font size (12) and double spacing. Two neatly typed and soft bound (paperback) copies of the report will be submitted to the College/Institute. The report will be typed in A-4 size paper.
6. The report will have two certificates. One by the Head of the Department and the other by the Reporting Officer of the organization where the student has undergone training. These two certificates should be attached in the beginning of the report.
7. The Summer Internship Project Report will carry 100 marks and will be evaluated by two examiners (external and internal). The evaluation will consist of (1) Project Report evaluation (2) Project Presentation and Viva. The Project Report evaluation will comprise of 50 marks and would be evaluated by internal project guide. The Presentation and Viva Voce would comprise of 100 marks and would be evaluated by two

examiners (1 external and 1 internal). Only such person will evaluate the project report who has minimum three years of experience of teaching MBA classes in a College/University. Experience of teaching MBA classes as guest faculty shall not be counted.

8. It is mandatory that the student will make presentation in the presence of teachers and students. The student is expected to answer to the queries and questions raised in such a meeting.

9. The student shall prepare the Summer Internship Project Report as per the format given in the Summer Training Manual as prescribed by the Institute.

10. Students must publish their research paper in national / international journal or can present their research paper in national / international conference or conference proceedings.

Project Report Evaluation: (Internal)

Relevance of Objectives with Topic (10)	Relevance of Research Methodology (20)	Interpretation and Analysis (20)	Total (50)
---	--	----------------------------------	------------

Presentation and Viva Voce Presentation: (External)

Relevance of Objectives with Topic (10)	Relevance of Research Methodology (20)	Interpretation and Analysis (30)	Presentation and Communication Skills (30)	Query Handling (10)	Total (100)
---	--	----------------------------------	--	---------------------	-------------

Course outcome: At the end of course, the student will be able to:

CO1	Identify and analyze business problem in an organization through research.	Understanding (K2)
CO2	Develop the ability to identify the various functions of the organization.	Analyze (K4)
CO3	Identify causes and effects of the problem.	Evaluating (K5)
CO4	Develop ability to interpret data and draw conclusions	Creating (K6)
CO5	Develop Multi-Disciplinary Approach for identifying and solving business problems	Creating (K6)

MBA SECOND YEAR					
Course Code	AMBAFM0311	L	T	P	Credit
Course Title	Security Analysis and Portfolio Management	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 hours	
1	Introduce students to stock, stock market and approaches to investing in the stock market and building stock portfolios.				
2	Understanding of investment theory will be stressed and tied in with discussion of applicable techniques such as portfolio selection.

MBA SECOND YEAR					
Course Code	AMBAHR0311	L	T	P	Credit
Course Title	HR Analytics	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Understand the concept of HR Analytics, analytic value chain, organizational system				
2	Equip students with knowledge of various HR Analytics Framework HR benchmarks and metrics relevant to organizational goals				
3	Knowledge about the practices using HR analytics to support data-driven decision making				
4	Understand and apply the concept of HR metrics analysis which includes the recruitment & selection analysis, diversity analysis, performance analysis				
5	Understand the concept of HR Scorecard, interventions & formulation of evidence-based practices				
Pre-requisites: Basics of HRM					
Course Contents / Syllabus					
UNIT-I		HR Analytics in Perspective			8 Hours
Introduction to HR Analytics, Defining HR Analytics, Basic of HR Analytics, Role & Capability of Analytics, Evolution of HR Analytics, Typical Application of HR Analytics, Analytic Value Chain, HR Analytics: The wave for HR value creation. Valuing HR Analytics in the Organizational System. Understanding the Organizational System, Locating the HR Challenges in the System.					
UNIT-II		HRA Frameworks			8 Hours
Current approaches to measuring HR and reporting value from HR contributions, Strategic HR Metrics versus Benchmarking, HR Scorecards & Workforce Scorecards and how they are different from HR Analytics, HR Maturity Framework: From level 1 to level 5, HR Analytics Frameworks: (a) LAMP framework; (b) HCM:21 Framework and (c) Talent ship Framework, 5 overarching components of an effective Analytics framework.					
UNIT-III		Insight into Data Driven HR Analytics & HR Metrics			8 Hours
Defining metrics , Demographics, data sources and requirements, Types of data, tying data sets together, Difficulties in obtaining data, Typical data sources, Typical questions faced (survey), Typical data issues, Connecting HR Analytics to business benefit (case studies), Techniques for establishing questions, building support and interest, Obtaining data, Cleaning data (exercise), Supplementing data, ethics of measurement and evaluation. Human capital analytics continuum.					
UNIT-IV		HR Metric Analysis			8 Hours
Recruitment and Selection Analytics: Evaluating Reliability and validity of selection models, finding out selection bias, Predicting the performance and turnover. Diversity Analysis: Equality, diversity, and inclusion, measuring diversity and inclusion, Testing the impact of diversity, Workforce segmentation and search for critical job roles. Performance Analysis: Predicting employee performance, training requirements, evaluating training and development, Optimizing selection and promotion decisions					
UNIT-V		HR Scorecard			8 Hours
Assessing HR Program, engagement, and Turnover, finding money in Analytics, Linking HR Data to operational performance, HR Data, and stock performance. Creating HR Scorecard, develop an HR measurement system, guidelines for implementing a HR Scorecard. Monitoring impact of Interventions: Tracking impact interventions, Evaluating stress levels and value-change. Formulating evidence-based practices and responsible investment. Evaluation mediation process, moderation, and interaction analysis					

Course outcome: At the end of course, the student will be able to:		
CO 1	Understand the concepts & fundamental of HR analytics, value chain & organizational system	Understand (K2)
CO 2	Apply relevant HR Analytics framework for problem solving	Apply (K3)
CO 3	Analyzing different techniques of data driven and HR metrics	Analyze (K4)
CO 4	Apply various analysis techniques and should use for decision making	Apply (K3)
CO 5	Analyze the HR Scorecard, monitoring the impact of interventions & evaluate the mediation process, moderations and interaction analysis.	Analyze (K4)

MBA SECOND YEAR					
Course Code	AMBAHR0312	L	T	P	Credit
Course Title	Employee Relations and Labor Law	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Provide conceptual framework of Industrial Relations.				
2	Understand and apply the concept of industrial relations and the system in which it operates.				
3	Make aware of the present state of Industrial relations in India.				
4	Understand the laws relating to Industrial Relations, Social Security and Working conditions and major reforms in labour laws.				
Pre-requisites: Basics of HRM					
Course Contents / Syllabus					
UNIT-I		Employee Relations Management (ERM) & Industrial Relation			Hours 8
Employee Relations Management (ERM) & Industrial Relation: Introduction and Importance of Employee Relations Management, Employee Relations Management Tool, Aspects of Industrial Relations, Emerging challenges of IR in India, Linking Industrial Relations with economic growth of a country, Negotiations and Counseling. Trade Unionism: Development of trade unionism, functions, type and structure, problems & suggestive remedial measures of trade unions, The Trade Unions Act 1926: Objective, Recognition and registration, Industrial Democracy & Participative Management. Case Studies					
UNIT-II		Collective Bargaining			Hours 8
Collective Bargaining: Significance, types & procedure of Collective bargaining Discipline: The Industrial Employment (Standing Orders) Act 1961, Misconduct, Disciplinary Action, Types of Punishments, Code of Discipline, Domestic Enquiry, Grievance Handling in IR: Grievance Settlement Procedure, Industrial Disputes, Preventive & Settlement Machinery in India. Employee Participation and Empowerment: Objectives, Employee Participation, Advantages of Employee Participation, Employee Participation in India, Methods of Participation, Employee Empowerment. Case Studies					
UNIT-III		Labor Law-I			Hours 8
The Factories Act, 1948 & The shop & Establishment Act, 1948; The Payment of Wages Act, 1923; The Workmen's compensation Act, 1972; The Industrial Disputes Act, 1947. Conflict management: Definition, Levels, Sources, Stages, Cause and Effects of conflicts, Reactions and Responses towards conflict, Conflict Resolution Process.					
UNIT-IV		Labor Law-II			Hours 8
The Payment of Minimum Wages Act 1936, The Contract Labor (Abolition & regulative) Act; The ESI Act, 1948; The Trade Unions Act, 1926, Child Labour (Prohibition & Regulation) Act, 1986 and its latest amendment. Scheduled Castes and Scheduled Tribes Commission.					

UNIT-V	Labor Law-III	Hours 8
<p>The payment of Bonus Act, 1965; The payment of Gratuity Act, 1972; The Maternity Benefit Act, 1961; Employee's Provident fund & Miscellaneous Provisions Act, 1952. The Industrial Relations Code Bill, 2020; Code on Social Security Bill, 2020 and the Occupational Safety, Health and Working Conditions Code Bill, 2020.</p>		
<p>Course outcome: At the end of course, the student will be able to:</p>		
CO 1	Knowledge of Industrial Relation framework	(Understand) K2
CO 2	Competency to understand the importance of Employee Relation within the perspective of Industrial Relation	(Understand) K2
CO 3	Knowledge about relevant Laws of HR management	(Apply) K3
CO 4	Competency to interpret and implement the Labour Laws within organization	(Evaluate) K5
CO 5	Competency to use Collective Bargaining and Grievance redressal Mechanism	(Apply) K3

MBA SECOND YEAR					
Course Code	AMBAHR0313	L	T	P	Credit
Course Title	Performance and Reward Management	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Create an understanding of the key concepts of performance management and contemporary methods for administering compensation and rewards in practices				
2	Articulate the benefits of using a performance development plan and the consequences of not having one in place.				
3	Distinguish the elements of an effective, integrated performance development system.				
4	Familiarize the students with the concept of competency mapping and understanding its role in career development				
5	Familiarize students with various aspects of compensation system in India and make them understand various issues linked with the process of fixing salary dearness allowance, bonus, incentive scheme and benefits.				
Pre-requisites: Basics of HRM.					
Course Contents / Syllabus					
UNIT-I	Introduction to Performance Management				8 Hours
Introduction to Performance Management System :Meaning, Uses and purpose of Performance Management, Performance Management vs Performance Appraisal, Performance management and its challenges in current scenario, Performance management as a System and Process, Establishing Performance Criterion of developing an Effective Appraisal System, Criteria (KRA, KSA VS KPI). Case Studies					
UNIT-II	Managing Performance				8 Hours
Managing Performance: Methods of managing performance of all the levels of Management, 360 degree Performance Appraisal, MBO and Performance analysis for Individual and organizational development. Human Resource Development: Introduction, Concept & Definition, Features, Objectives & Essentials HRD at Micro and Macro levels , Significance of HRD Distinction between Personnel Function and HRD , Instruments or Mechanism of HRD, Implementation of HRD, HRD in Indian Industry, HRD Strategies. Case Studies					
UNIT-III	Competency Mapping				8 Hours
Contemporary Issues: Potential appraisal, Competency mapping ,Competency mapping approaches & its linkage with Career Development and Succession planning, Balance score card: Introduction and Applications, Advantages and limitations. Benchmarking.					
UNIT-IV	Reward System				8 Hours
Reward System: Compensation- Definition, Function, and significance. Job evaluation: Methods of job evaluation, Inputs to job evaluation, Practical implication for technical/non-technical and executive/managerial positions and significance of wage differentials. Case Studies					
UNIT-V	Compensation System				8 Hours

Compensation: Method of pay and Allowances, Pay structure: Basic Pay, DA, HRA, Gross Pay, Take home pay etc, Calculation of :PF, ESI, BONUS and Gratuity , Cost To Company. Incentive schemes; Methods of payment: Time and piece rate. Fringe benefits & other allowances: Overtime, City compensatory, Travelling etc. Regulatory compliance: Introductions, Wage and Pay commissions, Overview of minimum wages Act-1948 and Equal Remuneration Act-1976. Profit Sharing options; Case Studies.

Course outcome: At the end of course, the student will be able to:

CO 1	Knowledge of Performance Management and Performance Appraisal	(Understand) K2
CO 2	Competency to understand the importance of importance of Performance Management	(Understand) K2
CO 3	Knowledge about the Compensation and Reward Systems	(Understand) K2
CO 4	Competency to implement the effective reward systems in the organization	(Evaluate) K5
CO 5	Ability to explain the relevance of competency mapping and understanding its linkage with career development	(Apply) K3

MBA SECOND YEAR					
Course Code	AMBAMK0311	L	T	P	Credit
Course Title	Digital and Social Media Marketing	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Provide understanding of digital and social media marketing practices.				
2	Provide understanding of the concept of social media platforms				
3	Impart learning on various digital channels and how to acquire and engage consumers online.				
4	Provide insights on building organizational competency by way of digital marketing practices and cost considerations.				
5	Develop understanding of the latest digital practices for marketing and promotion.				
Pre-requisites: Understanding of Basics of marketing concepts and social media platforms					
Course Contents / Syllabus					
UNIT-I	Introduction to Digital Marketing				08 Hours
Introduction to Digital Marketing: The new digital world - trends that are driving shifts from traditional marketing practices to digital marketing practices, the modern digital consumer and new consumer's digital journey. Marketing strategies for the digital world - latest practices. Skills required in Digital Marketing. Marketing Mix (7Ps) in online context, Integrated Internet Marketing communication.					
UNIT -2	Acquiring & Engaging Users through Digital Channels				08 Hours
Acquiring & Engaging Users through Digital Channels: Understanding the relationship between content and branding and its impact on sales. Digital Promotion Technique: overview of search engine optimization (SEO), search engine marketing, mobile marketing, video marketing, email marketing, viral marketing, content marketing and social-media marketing, Marketing gamification, Online campaign management; using marketing analytic tools to segment, target and position.					
UNIT-3	Social Media Marketing				08 Hours
Social Media Marketing –The Role of Social Media Marketing, Meaning, Purpose, types of social media websites. Introduction to Blogging, Create a blog post for your project. Include headline, imagery, links and post, Content Planning and writing. Introduction to Facebook, Twitter, Google +, LinkedIn, YouTube, Instagram and Pinterest; their channel advertising and campaigns.					
UNIT-4	Designing Organization for Digital Success				08 Hours
Designing Organization for Digital Success: Digital transformation, digital leadership principles, online P.R. and reputation management. ROI of digital strategies, how digital marketing is adding value to business, and evaluating cost effectiveness of digital strategies. Planning website design, understanding site user requirement, site design and structure, develop and testing site.					
UNIT-5	Digital Innovation and Trends				08 Hours
Digital Innovation and Trends: The contemporary digital revolution, digital transformation framework; security and privatization issues with digital marketing, Understanding trends in digital marketing – Indian and global context, online communities and co-creation. Managing online customer experience and e-survey.					

Course outcome: At the end of course, the student will be able		
CO1	Students will develop an understanding of digital and social media marketing practices.	Apply (K3),
CO2	Students will develop understanding of the social media platforms	Evaluate (K5)
CO3	Students will acquire the skill to acquire and Engage consumers online	Create (K6)
CO4	Students will develop understanding of building organizational competency by way of digital marketing practices and cost considerations	Create (K6)
CO5	Students will develop understanding of the latest digital practices for marketing and promotion.	Analyze (K4)

MBA SECOND YEAR					
Course Code	AMBAMK0312	L	T	P	Credit
Course Title	Product and Brand Management	3	1	0	4
Course objective: Objective of this course is to:				Duration:40 Hours	
1	Learn fundamentals of Product and Brand Management.				
2	Make understand about competition at product level as well as brand level.				
3	Understand the role of brands, components of brands, brand equity				
4	understand the Brand Positioning and Brand marketing Programs				
5	Provide insights into the conceptual framework for Strategic Brand Management.				
Pre-requisites: Having an understanding of Basics of Product and Brand Management					
Course Contents / Syllabus					
UNIT-I		Introduction to Product Management			08 Hours
Introduction to Product & Product Related Concepts: Product Management & Scope, Define Product, Classification of Product, Product Levels, Product Hierarchy. Product Life Cycle: Product Life Cycle Stages and corresponding Strategies and Product Evaluation. Product Portfolio: Concept, Factors influencing Product Portfolio, The BCG Growth Matrix, Shell's Directional Policy Matrix					
UNIT -2		New Product Strategy			08 Hours
New Products: New Product Categories, Organization for Product Management, prototyping, New Product Development Process, test marketing. New product strategy: The need for Product Innovation Strategy, the components of new Product Strategy Commercialization: Test Marketing, Time to Market, Breaking into the Market, Managing Growth, Resistance to Change, Leveraging new Product Growth, Sustaining Differentiation Managing the mature Product: Offensive Strategies, Extending the product life cycle, Customer Relationship Management.					
UNIT-3		Introduction to Brand Management and Brand Equity			08 Hours
Branding Basics: Brand, branding and significance of branding, Branding challenges and opportunities, Brand equity concept, Strategic brand management process, Identifying and establishing brand positioning, Planning and implementing brand marketing programs, Measuring and interpreting brand performance, growing and sustaining brand equity. Brand Equity concept and Brand Equity Models: Brand Asset Valuation, Aaker Model, Brand Resonance.					
UNIT-4		Brand Positioning and Brand Marketing Programs			08 Hours
Brand knowledge, Customer-based Brand equity Sources of brand equity - Brand Awareness, Brand Image, The Four steps of brand building, Creating customer value Identifying and establishing brand positioning, Positioning guidelines. Planning and Implementing Brand Marketing Programs: Choosing brand elements to build brand equity, Options and tactics for Brand, Integrating marketing communication to build brand equity, Conceptualizing the leveraging process, Co- branding, Celebrity Endorsement.					
UNIT-5		Measuring, Growing and Sustaining Brand Equity			08 Hours
The brand value chain, Designing brand tracking studies, Capturing customer mind set through quantitative research techniques. Brand architecture, Brand hierarchy, Designing brand strategy, Brand extensions- advantage and disadvantage- Reinforcing brands, Revitalizing brands, Brand Failures.					

Course outcome: At the end of course, the student will be able		
CO1	Students will develop an understanding of Product and brand management	Apply (K3)
CO2	Students will develop understanding of the Product Level and Brand level	Evaluate (K5)
CO3	Students will acquire the skill to Brand management and Brand equity	Create (K6)
CO4	To enable learners to understand basics of brand equity, insights into the conceptual framework for Strategic Brand Management	Create (K6)
CO5	Understand the various aspects of Product Management and Product Strategy, strategic significance of Product and Brand Management in business.	Analyze (K4)

MBA SECOND YEAR					
Course Code	AMBAMK0313	L	T	P	Credit
Course Title	Consumer Behavior & Advertising Management	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Understand consumer behavior and explain the consumer decision making process.				
2	Define external and internal influences on buying behavior.				
3	Understand advertising management and its framework.				
4	Understand the theoretical aspects of advertising effectiveness on consumers.				
5	Understand the ethics related to advertising and consumer behavior. Also creates understanding of Budgetary control in advertising.				
Pre-requisites: Having basic understanding of Consumer Behavior & Advertising					
Course Contents / Syllabus					
UNIT-I	Introduction to Consumer Behavior				08 Hours
Introduction: Introduction to Consumer Behavior; Applications of consumer behavior knowledge in marketing. Consumers and Customer, Consumer Behavior in the Contemporary Environment. Introduction, Problem Recognition, Information Search, Evaluation of Alternatives, Post-Purchase Behavior, Attribution theory and Diffusion of Innovation.					
UNIT-II	Consumers as individuals and in the social context				08 Hours
Consumers as individuals and in the social context: Consumer Perception, Consumer Attitude Formation & Change, Behavioral learning theories and cognitive learning theories to consumer behavior. Reference Groups, Family, Gender & Age Influences, Social Class & Consumer Behavior, Cultural Influences on Consumer Behavior.					
UNIT-III	Advertising Management				08 Hours
Overview of Advertising Management: Introduction, Meaning and Framework of Advertising; Defining Advertising; Advertising to Persuade the Buyer; Importance of Advertising in Marketing; Role of Advertising in Marketing Mix and Positioning; Advertisers and Advertising Agencies; Choosing an Advertising Agency.					
UNIT-IV	Concepts of Advertising and its kinds				08 Hours
Structure of an Advertising Agency: Introduction, Overview of an Advertising Agency; Marketing research department; Ancillary Services; Interfacing with Client's Organization; Integration of Services. Advertising Effectiveness; Kinds of Advertising Objectives; The Advertising Communication System, its Process, Advertising Copy and Design strategy, Types of advertising copy; Creativity in Advertising.					
UNIT-V	Ethics and Budget of Advertising				08 Hours
Advertising Budgets: Introduction, Factors Influencing Budget Setting, Typical Spending Patterns, Common Budgeting Approaches, Budgeting Methods, Decision Support System (DSS), Structure of DSS, Allocating the Marketing Communication Budget. Ethics in Advertising, Introduction, The Advertising Standards Council of India (ASCI); Forms of Ethical Violations; Misleading advertising; Advertising to children, Product endorsements, Stereotyping, Cultural, religious and racial sensitivity in advertising.					
Course outcome: At the end of course, the student will be able to					

CO 1	Understand the three major influences on customer choice: the process of human decision making in a marketing context; the individual customers make up; the environment in which the customer is embedded.	Understand (K2)
CO 2	Develop the cognitive skills to enable the application of the above knowledge to marketing decision making and activities.	Create (K6)
CO 3	Understand advertising management, its role, importance, types in marketing positioning,	Understand (K2)
CO 4	Develop the understanding of advertising agency advertising effectiveness, types , communication process and design strategy.	Apply (K3)
CO 5	Understand the factors influencing budget setting and ethics related to advertising and consumer behavior.	Evaluate(K5)

Text books

2. Copley Paul: Marketing Communications Management Concepts &Theories, Cases and Practices; Butterworth Heinemann Publication.

MBA SECOND YEAR					
Course Code	AMBABI0311	L	T	P	Credit
Course Title	ERP Modules	3	1	0	4
Course objective: Objective of this course is to:					Duration: 40 Hours
1	Impart knowledge about Enterprise Resource Planning (ERP)				
2	Impart knowledge of related technologies				
3	Impart knowledge about implementation of ERP				
4	Analyze the applications of ERP at operational levels				
5	Analyze the applications of ERP at managerial practices				
Pre-requisites:					
Course Contents / Syllabus					
UNIT-I	Introduction to ERP	8Hours			
Enterprise: Overview of Enterprise Resources & Business Functions, Classifications of Business Processes, Business Process Management System; Information: Characteristics and Value of information in enterprise; Information System: Components of an Information System, Characteristics and uses of Decision Support System, Executive Information System & Management Information System; Business Process Modeling: Automation and Structuring of Business Processes, Business Process Reengineering (BPR). Cross Functional and Integrated Enterprise Systems;					
UNIT-II	ERP Technologies	8 Hours			
Enterprise Systems and Enterprise Resources Planning (ERP): Characteristics of Enterprise Systems, Enterprise Applications and ERP, Evolution of ERP System, Benefits of an ERP System; ERP Related Technologies: Database & Data Warehouse, Data Mining, On-Line Analytical Processing, Workflow Management Systems.					
UNIT-III	ERP Modules	8 Hours			
ERP Modules: Finance, Production planning, Sales & Distribution, Human resource management (HRM), Inventory Control System, Quality Management, Cost Management, Plant Maintenance Management, ERP in Supply Chain Management and Customer Relationship Management, CAQ & CIQ. ERP Solutions in the markets and ERP Domains: Sector specific ERP Solutions, Introduction and Characteristics of SAP, BAAN and Oracle ERP.					
UNIT-IV	ERP Implementation	8 Hours			
ERP and Value Chain: Impacts of ERP on Value Chain (Porter's Value Chain Model), Competitive Advantages of ERP; Future Directions in ERP: New Trends in ERP, ERP to ERP II, ERP and e-business, SOA Factors in ERP; ERP Implementation: Evaluation and Selection of ERP Package, Project Planning, Testing & End User's Training, Post Evaluation and Maintenance, Issues and Challenges in ERP Implementation, Latest ERP Implementation Methodologies;					
UNIT-V	Post ERP Implementation	8 Hours			
ERP Project Team: Composition, Organization and Working of ERP Implementation Team, Success and Failure Factors in ERP Project. Post ERP Implementation: Organizational Change Management, Post Implementation Review, Post Implementation Support, ERP Security. IBM SPSS/Sales force/SAS Application.					
Course outcome: At the end of course, the student will be able to:					
CO1	Knowledge of ERP Technology and its importance	(Understand) K2			

CO2	Able to analyze the organizational readiness for ERP	(Analyze) K4
CO 3	Able to implement ERP in functional area of businesses and management	(Analyze) K4
CO4	Interpreting the impacts of ERP on business processes	(Evaluate) K5
CO5	Understanding the Market Trends in ERP applications	(Apply) K3
Text Books		
1.	ERP Demystified: Leon, Alexis (McGraw-Hill Education)	
2.	Concepts in Enterprise Resource Planning: Joseph, A. Brady, Ellen, F. Monk and Wangner, Bret J. (Thomson Learning)	
3.	ERP in practice – Vaman– TMH	
Reference Books		
1.	Daniel E.O’Leary, Enterprise Resource Planning Systems, Cambridge University Press, 2002.	
2.	Ellen Monk, Bret Wagner, Concepts in Enterprise resource planning, Cengage learning, Third edition, 2009.	

MBA SECOND YEAR					
Course Code	AMBABI0312	L	T	P	Credit
Course Title	Machine Learning & Artificial Intelligence	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Introduce the basic concepts of machine learning.				
2	Provide a strong foundation of fundamental concepts in AI.				
3	Help students to learn the application of machine learning / AI algorithms in different fields of Management.				
4	Enable the student to apply these techniques in application which involve perception, reasoning and learning.				
Course Contents / Syllabus					
UNIT-I	Foundation of Machine Learning				8 Hours
<p>Data Mining Introduction: Overview, Motivation, Definition & Functionalities, Data Processing, Form of Data Preprocessing, Data Cleaning: Missing Values, Noisy Data, (Binning, Clustering, Regression, Computer and Human inspection), Inconsistent Data, Data Integration and Transformation. Data Reduction: -Data Cube Aggregation, Dimensionality reduction, Data Compression, Numerosity Reduction, Discretization and Concept hierarchy generation.</p> <p>Machine Learning (ML)-- ML Techniques overview -- Validation Techniques (Cross-Validations) -- Feature Reduction/Dimensionality reduction -- Principal components analysis (Eigen values, Eigen vectors, Orthogonality).</p>					
UNIT-II	Supervised Learning Techniques				8 Hours
<p>Classification: Definition, Data Generalization, Analytical Characterization, Analysis of attribute relevance, Mining Class comparisons, Statistical measures in large Databases, Statistical-Based Algorithms, Distance-Based Algorithms, Decision Tree-Based Algorithms.</p> <p>Decision Trees -- ID4--C4.5-- CART ---Basic Ensembles methods – Bagging & boosting and its impact on bias and variance -- C5.0 boosting -- Random forest – Advanced Gradient Boosting Machines.</p>					
UNIT-III	Un-Supervised Learning Techniques				8 Hours
<p>Clustering- Distance measures -- Different clustering methods (Distance, Density, Hierarchical) -- Iterative distance-based clustering-- Dealing with continuous,--categorical values in K-Means--Constructing a hierarchical cluster-- K-Medoids-- k-Mode and density-based clustering -- Measures of quality of clustering</p> <p>Association Rule mining-- The applications of Association Rule Mining: Market Basket-- Recommendation Engines, etc.-- A mathematical model for association analysis-- Large item sets-- Association Rules -- Apriori--Constructs large item sets with mini sup by iterations-- Interestingness of discovered association rules-- Application examples-- Association analysis vs. classification -- FP-trees. - Machine Learning Applications across Industries---Healthcare— Retail--Financial Services— Manufacturing—Hospitality--Cloud Based ML Offerings.</p>					
UNIT-IV	Introduction of Artificial Intelligence				8 Hours
<p>Introduction : What is Artificial Intelligence (AI)---Definitions, The Foundations of AI, The History of AI, Applications of Artificial Intelligence, Agents and Environments, The Concept of Rationality, The Nature of Environments, The Structure of Agents, Problem Solving Agents, Computer Vision. Natural Language Possessing.</p>					
UNIT-V	Searching & Trends in Artificial Intelligence.				8 Hours

<p>Introduction to Search : Searching for solutions, Uniformed search strategies, Informed search strategies, Local search algorithms and optimistic problems, Adversarial Search, Search for games, Alpha - Beta pruning.</p> <p>Recent Trends: Neural networks, Reinforcement learning, Emerging NN architectures -- Recurrent Neural Networks, Building recurrent Neural Networks, Long Short-Term Memory, Time Series Forecasting. AI in Cyber security, The Fusion of AI and IoT, Conversational AI& Expert System.</p>		
<p>Course outcome: At the end of course, the student will be able to:</p>		
CO1	Understand the concepts of data mining & machine learning	(Understand) K2
CO2	Use different machine learning techniques to design AI Machine and enveloping applications for real world problems.	(Apply) K3
CO 3	Use non supervised learning techniques to design and solve AI Issues.	(Apply) K3
CO4	Demonstrate fundamental understanding of artificial intelligence.	(Apply) K3
CO5	Apply basic principles of AI in solution that require problem solving , knowledge presentation and learning.	(Create) K6
<p>Text Books</p>		
<p>1. Jiawei Han MichelineKamber Jian Pei, “Data Mining: Concepts and Techniques”, Morgan Kaufmann.</p>		
<p>2. Alex Berson, Stephen J. Smith “Data Warehousing, Data-Mining & OLAP”, TMH</p>		
<p>3. Elaine Rich and Kevin Knight: Artificial Intelligence , Tata McGraw Hill</p>		
<p>Reference Books</p>		
<p>1. Artificial Intelligence: A Modern Approach. Stuart Russell, Peter Norvig, Pearson Education 2nd Edition.</p>		
<p>2. Elaine Rich and Kevin Knight: Artificial Intelligence , Tata McGraw Hill</p>		
<p>3. Dan W.Patterson, Introduction to Artificial Intelligence and Expert Systems, PrenticeHall of India</p>		
<p>4. David W Rolston: Principles of Artificial Intelligence and Expert System Development, McGraw Hill</p>		

MBA SECOND YEAR						
Course Code	AMBABI0313	L	T	P	Credit	
Course Title	Cloud & Big Data	3	1	0	4	
Course objective: Objective of this course is to:				Duration:40 Hours		
1	Provide students with the fundamentals and essentials of Cloud Computing.					
2	Enable students to start using and adopting Cloud Computing services and tools in their real life scenarios.					
3	Understand the importance of information management for a business organization.					
4	Provide basic knowledge on Big Data.					
Course Contents / Syllabus						
UNIT-I	Introduction to Cloud Computing				8 Hours	
Introduction to Cloud Computing – Definition of Cloud – Evolution of Cloud Computing – Underlying Principles of Parallel and Distributed Computing –Cloud Characteristics – Elasticity in Cloud – On-demand Provisioning.						
UNIT-II	Cloud Architecture, Services and Storage.				8 Hours	
Layered Cloud Architecture Design – NIST Cloud Computing Reference Architecture – Public, Private and Hybrid Clouds – IaaS – PaaS – SaaS – Architectural Design Challenges – Cloud Storage – Storage-as-a-Service – Advantages of Cloud Storage – Cloud Storage (Block Vs Object Storage) , Cloud Providers – AWS						
UNIT-III	Cloud Enabling Technologies				8 Hours	
Service Oriented Architecture – REST and Systems of Systems – Web Services– Publish-Subscribe Model Basics of Virtualization – Types of Virtualization– Implementation Levels of Virtualization – Virtualization Structures – Tools and Mechanisms – Virtualization of CPU – Memory – I/O Devices – Virtualization Support and Disaster Recovery						
UNIT-IV	Resource Management and Security in Cloud				8 Hours	
Inter Cloud Resource Management – Resource Provisioning and Resource Provisioning Methods – Global Exchange of Cloud Resources – Security Overview – Cloud Security Challenges – Software-as-a Service Security – Security Governance – Virtual Machine Security – IAM – Security Standards.						
UNIT-V	Cloud technologies and Advancements				8 Hours	
Introduction to Big Data, 5 V's of Big Data & Hadoop – Virtual Box — Google App Engine – Programming Environment for Google App Engine — Open Stack – Federation in the Cloud – Four Levels of Federation – Federated Services and Applications – Future of Federation. Research Trends in Cloud: Fog Computing.						
Course outcome: At the end of course, the student will be able to:						
CO 1	Provide students with fundamentals and essentials of Cloud Computing.				(Understand) K2	
CO 2	Realize cloud infrastructures by using IaaS Software, while also developing cloud applications by utilizing PaaS Software.				(Create) K6	
CO 3	Generate new ideas and innovations in cloud computing using virtualization				(Create) K6	

CO 4	Gain knowledge about the security in Cloud Computing.	(Apply) K3
CO 5	Learn the application of recent Cloud Technologies	(Analyze) K4

MBA SECOND YEAR					
Course Code	AMBA0401	L	T	P	Credit
Course Title	Project Management	3	0	0	3
Course objective: Objective of this course is to:				Duration: 36 Hours	
1	To empower the students to get insights of basic concepts on project management.				
2	To create awareness on the roles and responsibilities of project manager.				
3	To build the confident among the students to take up any kind of projects.				
4	To sharpen the planning, scheduling and controlling skills of the students with respect to individual projects.				
5	To understand the perspectives in which optimum decisions are to be taken in case of risks with planned activities in project.				
Pre-requisites: Fundamentals of Accounting, and Financial Management					
Course Contents / Syllabus					
UNIT-I	Introduction of Project				06 Hours
Projects – Definition and Objectives – Project Management Vs General Management – Roles and Responsibilities of Project Manager – Selection of Project Manager – Selection of Projects – Understanding Project Life Cycle. Project Team and Scope of Project Management: Characteristics of a Project Team & Project Leader, Project Organization, and Importance of Project Management. Case Studies					
UNIT-II	Project Identification & Selection				08 Hours
Project Identification & Selection: Identification, Generation of ideas, Approaches to Project Screening and Selection, Project Rating Index. Market & Demand Analysis Techniques: Survey & Trend Projection Methods. Project Risk Management: Concepts and Types of Project Risks, Risk Identification, Risks Analysis, Risks Mitigation Strategies. Case Studies					
UNIT-III	Budgeting the Project				08 Hours
Fundamental components of Project Cost, Types of Costs: Direct, Indirect, Recurring, Non-Recurring, Fixed, Variable, Normal, Expedite costs Methods of budgeting – Project cost estimation – Improving cost estimates – Budget uncertainty and risk management – Scheduling the project – Gantt chart – Resource allocation and loading – Social Cost Benefit Analysis (SCBA) of Project: Concept & significance of SCBA, Approaches to SCBA. Case Studies					
UNIT-IV	Project Scheduling and Network Analysis				08 Hours
Steps in Project Scheduling and Network design, Gantt Chart, Work Breakdown Structure (WBS) & Responsibility Assignment Matrix. Project Network Design: Identifying the Nodes and Activities, Activity on Arrow (AoA) and Activities on Node (AoN) methods, Introduction to PERT and CPM, Crashing in Projects. Case Studies					
UNIT-V	Monitoring and controlling the project				6 Hours
Monitoring the project – Control cycle – Project control – Designing the control system – Evaluation of project: Milestone Analysis and Tracking Gantt chart. Earned Value Analysis (EVA): Planned Value (PV), Earned Value (EV), Cost Variance (CV), Schedule Variance (SV), Cost performance Index (CPI), Schedule performance Index (SPI) – Project auditing – Project termination: Types of Terminations, Project Termination Process. Case Studies					
Course outcome: At the end of course, the student will be able to:					

CO 1	Understand the basic concepts and characteristics of Project and Project manager, management	Understanding (K2)
CO 2	Understand the roles and responsibilities along with tools & techniques used in Project management	Evaluating (K5)
CO 3	Develop confident to take up any kind of projects	Evaluating (K5)
CO 4	Students will understand the scheduling and monitoring process in Project. They will be able to apply PERT and CPM method for project scheduling	Applying (K3)
CO 5	Students will understand the perspectives in which optimum decisions are to be taken in case of risks with planned activities in project	Creating (K6)

MBA SECOND YEAR					
Course Code	AMBA0459	L	T	P	Credit
Course Title	Research Project Report	0	0	6	3
Course objective: Objective of this project is to:				Duration: 20 Contact Hours	
1	Educate regarding research designs and the research process.				
2	Develop the ability to analyze research reports (from scholarly articles) synthesize key points, cite the conclusions, and format the article's bibliographic citation using correct APA format.				
3	Help the students to develop and present the design of data collection and ability to interpret the data as per the sample collected				
4	Comprehend and apply various statistical tools for data analysis and its interpretation.				
<p>Research Project Report (RPR) In fourth semester, the candidates will have to submit a Research Project Report on a problem/topic (from the specialization areas) to be assigned by the MBA department under the supervision of a core faculty member of the department.</p> <ul style="list-style-type: none"> • The Research Project Report will carry 200 marks. • The evaluation of the project report will be done by two examiners (external & internal). • The evaluation will consist of (1) Evaluation of Project Report (2) Presentation and Viva Voce. • The evaluation of Project Report will comprise of 100 marks and would be evaluated by the internal guide. • The evaluation of Viva Voce of Project would comprise of 100 marks and would be evaluated by two examiners (1 external and 1 internal). <p>The average of the marks awarded by the 2 examiners during the End Semester Viva voce will be taken into account for the results.</p> <p>The report will contain:</p> <ul style="list-style-type: none"> • The objectives and scope of the study. • Research Methodology, • Use and importance of the study, • Analysis of data collected, Findings and interpretation, • Conclusions and recommendations. • Satisfactory completion of minimum 1 'Research Publication' in a listed Journal is mandatory for award of degree. <p>It will contain relevant charts, diagrams and bibliography.</p> <p>A certificate of the supervisor and the Head of the MBA program certifying the authenticity of the report shall be attached therewith.</p> <p>The student will submit two copies of the report to the Head of MBA program. The number of pages in the report will be minimum 75 or more. The report should be typed in A-4 size paper.</p> <p>The scheme of evaluation for Research Project Report are as follows:</p> <p>Criteria: Internal 100 Marks</p> <ul style="list-style-type: none"> • Relevance of Objectives with topic (20) • Relevance of Research Methodology(20) • Interpretation & Analysis (20) • Project Report (20) • Paper Publication in Journal of Repute (20) <p>The scheme of evaluation of Viva voce</p> <p>Criteria: External 100 Marks</p> <ul style="list-style-type: none"> • Understanding of Objectives with topic (20) • Understanding of the relevance of Research (20) 					

- Interpretation & Analysis (20)
- Presentation & Communication skills (20)
- Query Handling (20)

Abstract

List of Contents

List of Figures

List of Tables

Chapter 1: Introduction- Objective of the study

1.1. Problem Definition

1.2. Overview of the Proposed Approach

1.3. Motivation behind the Proposed Approach

1.4. Organization of the Report

Chapter 2: Literature Review

Chapter 3: Research Methodology

Chapter 4: Data Analysis and Interpretation

Chapter 5: Findings, Recommendation and Conclusion

References

Appendix (Attach Research Paper with front page of the Journal in which it is Published)

Course outcome: At the end of course, the student will be able

CO 1	The student will demonstrate cognitive knowledge of research designs and the research process in general.	Understanding (K2)
CO 2	The student will demonstrate the ability to analyze research reports (from scholarly articles) synthesize key points, cite the conclusions, and format the article's bibliographic citation using correct APA format.	Evaluating (K5)
CO 3	The student will be able to design an original research project, including an instrument for data collection, achieving a level of proficiency according to the assessment rubrics provided for each section of the proposal.	Creating (K6)
CO 4	The student will be able to defend his project with clarity in presentation and analysis.	Analyze(K4), Creating (K6)

MBA SECOND YEAR						
Course Code	AMBAFM0411		L	T	P	Credit
Course Title	Financial Modeling		3	1	0	4
Course objective: Objective of this course is to:			Duration: 40 Hours			
1	Equip the student with the knowledge of valuation in firm.					
2	Develop the ability to use MS Excel for financial modeling through various formulae					
3	Make the students capable of conducting financial statement analysis independently.					
4	Develop the ability for assessing and forecasting project requirement and conducting ratio analysis					
5	Conduct the equity research modeling for investment					
Pre-requisites: Knowledge of Financial statement analysis, Basic MS-Excel, Financial markets						
Course Contents / Syllabus						
UNIT-I	Valuation				Hours: 8	
Valuation & its importance, Understanding enterprise value and equity value, Comparable Company Analysis, Precedent Transactions Analysis: Selecting comparable transactions, Spreading comparable transactions, Discounted Cash Flow (DCF) analysis: Understanding unlevered free cash flow, Forecasting free cash flow, Forecasting terminal value, Present value and discounting						
UNIT-II	Basic Excel for Financial Modeling				Hours: 8	
Formatting of Excel Sheets, Use of Excel Formula Function, Data Filter and Sort, Charts and Graphs, Table formula and Scenario building, Lookups: Vlookup Match & offset, pivot tables. Portfolio Models, Matrix Operations and Data Tables.						
UNIT-III	Financial Statement Analysis				Hours: 8	
Introduction to Financial Statement Analysis Financial Reporting Mechanics, Projecting the income statement, Projecting the balance sheet, Projecting the cash flow statement, Creating the debt and interest schedule, Revolver modeling, Financial Statement Application						
UNIT-IV	Financial Ratios & Project Finance				Hours: 8	
Ratio analysis of industries, Dupont Analysis, Peer to peer analysis, Preparation of Financial Analysis report on an industry. Project evaluation; stage of project; construction & development phase; funding & costs during investment phase; Cash flow waterfall						
UNIT-V	Equity Research Modeling				Hours: 8	
Introduction to Equity Analysis & Investing Evaluating Business Model & Industry Analysis, PE Analysis, Sensitivity Analysis, Screening Stocks for investment: Cloning & Filters, Impact of corporate actions on financials, Psychology of Investment.						
Course outcome: At the end of course, the student will be able to:						
CO 1	Understand and apply relevant technique for the relative valuation of the firms.		Understand (K1), Apply (K3)			
CO 2	Apply the MS Excel tools for financial modeling and valuation.		Apply (K3)			
CO 3	Understand & Apply various approaches of financial statement analysis.		Apply (K3)			

CO 4	Project & evaluate the requirements in managing the projects.	Analyse (K4), Evaluate (K6)
CO 5	Apply & use various tools and models for equity research.	Apply (K3)

MBA SECOND YEAR					
Course Code	AMBAFM0412	L	T	P	Credit
Course Title	Working Capital Management	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Have a basic understanding of working capital and assessing its requirement.				
2	Learn how to manage cash and other liquid assets.				
3	Learn and apply efficient techniques to manage and utilize the inventories.				
4	Develop a clear understanding and practicing regarding receivables of the organization.				
5	Make the student equip with the knowledge of financing the working capital from different financing sources.				
Pre-requisites: Student should have knowledge of accounting and financial management					
Course Contents / Syllabus					
UNIT-I	Introduction to Working Capital				Hours:8
Nature, Scope and Definition of Working Capital, Types of working Capital, Determinants of working capital , Working Capital Cycle, Assessment an Computation of Working Capital Requirement, Profitability–Liquidity trade-off, Working Capital Policy - Aggressive & Defensive. Overview of Working Capital Management					
UNIT-II	Cash & Marketable Securities Management				Hours:8
Meaning of Cash, Motives for holding cash, objectives of cash management, factors determining cash needs, Cash Management Models, Cash Budget, Cash Management: basic strategies, techniques and processes, Lock Box system and concentration banking, compensating balances ; Marketable Securities: Concept, types, reasons for holding marketable securities, alternative strategies, choice of securities; Cash Management Practices in India.					
UNIT-III	Receivables Management				Hours:8
Receivables: Nature & cost of maintaining receivables, objectives of receivables management, factors affecting size of receivables, policies for managing accounts receivables, determination of potential credit policy including credit analysis, credit standards, credit period, credit terms, etc; Collection Policies; Credit Management in India.					
UNIT-IV	Inventory Management				Hours:8
Inventory: Need for monitoring & control of inventories, objectives of inventory management, Benefits of holding inventory, risks and costs associated with inventories, Inventory Management: Minimizing cost in inventory, Techniques of Inventory Management - Classification, Economic order quantity, ABC Analysis, VED etc.					
UNIT-V	Financing of Working Capital				Hours:8
Need and objectives of financing of working capital, short term credit, mechanism and cost-benefit analysis of alternative strategies for financing working capital : accrued wages and taxes, accounts payable, trade credit, bank loans, overdrafts, bill discounting, commercial papers, certificates of deposit, factoring, secured term loans, etc; Pattern and sources of Working Capital Financing in India with reference to Government policies, working capital control and banking policy- prominent committees on working capital financing.					
Course outcome: At the end of course, the student will be able to:					

CO 1	Assess and analyze the working capital requirement of the firm.	Analyse (K4)
CO 2	Apply the techniques for managing cash and liquid assets of the firm.	Apply (K3)
CO 3	Plan and channelize the inventories in right quantity and at right time.	Analyse (K4)
CO 4	Apply the techniques of receivables management in order to enhance the cash position of the firm.	Apply (K3)
CO 5	Procure the funds for meeting the working capital needs of the firm.	Analyse (K4)

MBA SECOND YEAR

Course Code	AMBAFM0413	L	T	P		Credit
Course Title	Financial Derivatives & Risk Management	3	1	0		4
Course objective: Objective of this course is					Duration: 40 Hours	
1	To aware the students of different types of Derivatives.					
2	To develop an understanding amongst students of financial derivatives and associated regulatory framework.					
3	To have an understanding of the derivative tools such as options, futures and their application to hedging.					
4	To understand the concept of risk management					
Pre-requisites: Required Basic Knowledge for Financial Derivatives & Risk Management						
Course Contents / Syllabus						
UNIT-I	Introduction to Financial Derivatives					Hours:8
Definition, Evolution and features of Derivatives, Types of Derivatives, Forward , futures and options market, Forward market transactions , Forward contracts , Forward market in India , Hedging with forwards.						
UNIT-II	Forwards Contracts and Futures Contracts					Hours:8
Forward Contract, features of forward contracts Futures contract , types , functions , distinction between futures and forward , pricing of futures contract, Currency Futures , Hedging in Currency Futures , Speculation and Arbitrage in Currency Futures , Pricing of Futures, Cost of Carry Model , Application of Market Index , Index Futures in the Stock Market , Indian Derivatives Market.						
UNIT-III	Introduction to Options					Hours:8
Hedging with Currency Options , Speculation and Arbitrage with Options ,Pricing Options , General Principles of Pricing , Black Scholes option pricing Model Index Options , Hedging with Index Options, Speculation and Arbitrage with Index Options, Index Options Market in Indian Stock Market , Use of different option strategies to mitigate the risk.						
UNIT-IV	Financial Swaps					Hours:8
Financial Swaps, Managing Interest Rate Exposure, Interest Rate Swaps, Currency Swaps Interest Rate Futures, Forward Rate Agreements.						
UNIT-V	Risk Management					Hours:8
Risk Management:Definition, meaning and measurement of Risk- Classification of Risk- diversification- Statistical tools used in risk management - techniques of risk mitigation						
Course outcome: At the end of course, the student will						
CO 1	Understand how derivative securities work and how they are traded.					Knowledge (K2)
CO 2	Understand the principles of derivatives pricing, including the implications of arbitrage.					Evaluating (K7)
CO 3	Be able to know the price forward and futures contracts using the cost of carry model.					Synthesizing (K6)
CO 4	Be able to value options using the binomial and Black-Scholes option pricing models.					Applying (K4)

CO 5	Be prepared to use futures and options in financial risk management, speculation and arbitrage, interest future and forward rate agreement.	Synthesizing (K6)

MBA SECOND YEAR

Course Code	AMBAHR0411	L	T	P		Credit
Course Title	Talent Management	3	1	0		4
Course objective: Objective of this course is to:					Duration:40 Hours	
1	Provide insights to the process of attraction, acquisition, and retention of talent in Organizations.					
2	Develop a clear understanding of talent management and its linkage with organizational strategy and other HR practices.					
3	Provide the understanding of acquiring and retaining the talent in the organization.					
4	Provide them the process of identifying and developing the potential talent to fulfill the present and future need of the organization.					
5	Cover the emerging trends in Talent management such as HR Accounting, HR Audits.					
Pre-requisites: Basics of HRM						
Course Contents / Syllabus						
UNIT-I	Introduction to Talent Management					8 Hours
Introduction to Talent Management: Concept , Meaning & Objectives, Role of Talent Management in building Sustainable Competitive Advantage to a firm; Key Processes of Talent Management: Recruitment, Selection, Human Resource Planning, Retention, Talent vs. Knowledge, Consequences of Failure in Managing Talent, Identifying and Assessing High-Potential Talent: Current Organizational Practices .Case Studies						
UNIT-II	Talent Acquisition					8 Hours
Talent Acquisition: Job Analysis, Developing job Description & Job Specification, Attracting and Recruiting the best Talents, Strategic Trends in Talent Acquisition, Talent acquisition management solutions. HR Planning for Talent Management: Process (using MS-Excel and quantitative tools), Evaluation of factors affecting HR Planning, Strategic view of Recruitment & Selection. Case Studies						
UNIT-III	Strategic Recruitment and Selection					8 Hours
Recruitment and Selection Process: Introduction, Sources of Recruitment, Use of Assessment Centers, Selection Errors & Minimizing Selection Errors, Reliability & Validity of Selection Tests, Formulating a recruitment strategy for senior level executives. Talent Development: Need Analysis, Knowledge Management, Stress Management, Competency Development, Developing Leadership Talent and Emotional Capabilities. Case Studies						
UNIT-IV	Employee Retention					8 Hours
Employee Retention: Comprehensive approach to Employees Retention, Managing Voluntary Turnover, Dealing with Job Withdrawal; Strategic Compensation plan for Talent Engagement: Defining the Elements of Total Rewards, Integrated Rewards Philosophy, Designing Integrated Rewards, Sustainable Talent Management and Reward Model, Career and Succession Planning. Employee Engagement: Process and outcomes of Employee Engagement, Ways of Achieving Employee Engagement Case Studies						
UNIT-V	Emerging Trends in SHRM					8 Hours
Emerging Trends in HR: Human Resource Audits, Human Resource Information System (HRIS), Human Resource Accounting (HRA), Business Process Re-engineering, Contemporary Talent Management Issues and Challenges. Case Studies						
Course outcome: At the end of course, the student will be able to:						

CO 1	Knowledge of Talent Management Processes	(Understand) K2
CO 2	Analyse the impacts of Talent management in the organization	(Analyze) K4
CO 3	Competency to implement Talent Management practices	(Evaluate) K5
CO 4	Competency to develop leadership qualities among subordinate	(Evaluate) K5
CO 5	Knowledge about the reward system to support Talent management	(Apply) K3

MBA SECOND YEAR					
Course Code	AMBAHR0412	L	T	P	Credit
Course Title	Strategic Human Resource Management	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Understand the link between firm strategy and HR practices of the firm through Sustained Competitive Advantage.				
2	Understand the need for different HRM practices in alignment with different business strategies.				
3	Acquaint the students with the tools & techniques essential as a strategic contribution of HRM to organizational growth.				
4	Understand different ways in which HRM can be strategically pursued within organisations and its links with organisational performance.				
5	Understand the impact of HRM practices in global environment.				
Pre-requisites: Basics of HRM					
Course Contents / Syllabus					
UNIT-I		Introduction to SHRM			8 Hours
Conceptual Framework & Context of SHRM, Impacts of Globalization on HRM ,Changing Nature of Workforce, Development of SHRM, Models of Strategic HRM ,Workforce Diversity, Demographic changes, Challenges in Strategic Human Resource Management ,Impacts of Strategic HRM, SHRM for Competitive Advantage .					
UNIT-II		Implementation of SHRM			8 Hours
Implementation of Strategic HRM: Staffing, Training & Development, Strategic Options of Human Resource Development, Impacts of SHRM on Performance , Practicalities in Measuring SHRM Outcomes, Strategic Oriented Compensation System ,and Employee Separation .					
UNIT-III		HR Strategy and Employee Engagement			8 Hours
HR Strategy, Components of Strategic HRM, Organizational HR strategies, Functional HR strategies ,Strategic HRM in Action ,Improving Business Performance through Strategic HRM. Employee Engagement and Drivers of Engagement Learning Organizations and Organizational Learning .					
UNIT-IV		Strategic Knowledge Management			8 Hours
Strategic Knowledge Management, Building Knowledge Management into Strategy Framework, Knowledge Sharing as a Core Competency ,HR Dimension to Knowledge Management, Strategic Approach to Industrial Relations, Outsourcing & its HR implications, Human Side of Mergers and Acquisitions three-stage model of M&A.					
UNIT-V		Global HRM Practices			8 Hours
Global human resource management, Difference between global HRM domestic HRM; Strategic HR issues in Global Assignments, Expatriates selection & Repatriation, Building a Multicultural Organization, Investment perspectives of HR, Strategic Choice ,Leadership Strategic issues in International Assignment .					
Course outcome: At the end of course, the student will be able to					
CO 1	Understand the dimensions of Strategic HRM.				(Understand) K2

CO 2	Apply the learning of SHRM in organizational context.	(Apply) K3
CO 3	Evaluate the impacts of SHRM on competitive advantages	(Evaluate) K5
CO 4	Have desired level of expertise on organizational knowledge management through SHRM.	(Evaluate) K5
CO 5	Understand the International culture in SHRM.	(Understand) K2

MBA SECOND YEAR					
Course Code	AMBAHR0413	L	T	P	Credit
Course Title	Diversity of Workforce (IHRM)	3	1	0	4
Course objective: Objective of this course is to:				Duration:40 Hours	
1	Familiarize the students with HR management in Global perspective.				
2	Understand the complexity of workforce diversity in international context.				
3	Make the students aware of the international labor relations.				
4	Develop an understanding of expatriate's recruitment & training programs.				
Pre-requisites: Basics of HRM					
Course Contents / Syllabus					
UNIT-I		Introduction to IHRM			8 Hours
International Human Resource Management-Overview, Developments leading to International HRM Perspectives, International Human Resource Management: Role and Distinguishing Activities, Organisational Structure and HRM, International Human Resource Planning. Case Studies					
UNIT-II		Staffing & Compensation Practices in Global Context			8 Hours
Staffing Practices in International Human Resource Management, Recruitment and Selection for Overseas Assignments, Global Staffing Practices, International Transfers and Repatriation Strategies, Training and Development in International Context, International Performance Management, Global Compensation Practices. Case Studies.					
UNIT-III		Industrial Relations and Labour Standards in IHRM			8 Hours
Industrial Relations and International Practices in Industrial Relations, Shifts in IHRM and IR, International Strategic Human Resource Management, International Labour Standards, Global Unions, Regional Integration and Framework Agreements. Case Studies.					
UNIT-IV		Diversity Management in Global Context			8 Hours
Equal Opportunity and Diversity Management in Global Context. Sensitivity to Cultural Diversity, Global Organisation Structures, Emerging Trends in Employee Relations and Employee Involvement, Convergence or divergence in personnel management in developed and developing economies, Case Studies					
UNIT-V		Trends & Issues In IHRM			8 Hours
Emerging Trends in International HRM, HR/IR issues in MNCs and Corporate Social Responsibility, Case Studies					
Course outcome: At the end of course, the student will be able					
CO1	Understanding the Contexts of International HRM			(Understand) K2	
CO2	Knowledge about the HR Processes in International Context			(Understand) K2	
CO 3	Able to evaluate the impacts of Globalisation on HRM			(Evaluate) K5	
CO4	Desired level of expertise on organizational Issues.			(Evaluate) K5	
CO5	Understanding and applying the International culture in IHRM			(Apply) K3

MBA SECOND YEAR

Course Code	AMBAMK0411	L	T	P	Credit
Course Title	Sales and Retail Management	3	1	0	4
Course objective: Objective of this course is to:				Duration:40 Hours	
1	To build knowledge, understanding, and skills in Sales and Retail Management.				
2	Enable development and implementation of Sales and Retail Management strategies.				
3	Help to analyze decision alternatives and criteria in the context of realistic problem situations in Sales and Retail Management.				
4	To acquaint the students with both store and non-store retailing.				
5	To build knowledge about retail growth strategies.				
Pre-requisites: Having an understanding of Basics of Sales and retail management.					
Course Contents / Syllabus					
UNIT-I	Introduction of Sales				08 Hours
Introduction to Sales: Role of selling in marketing, Personal selling, Salesmanship and sales manager, Types of sales personnel, Characteristics of a successful salesman, Theories of selling, Sales management, Process of effective selling.					
UNIT -2	Building Sales Organization				08 Hours
Building Sales Organization: Types of sales organizations and their structure, Functions and responsibilities of sales person, filling sales positions, Recruitment, Selection, Training and Development, Development and Conducting Sales training programme.					
UNIT-3	Leading Sales Organization				08 Hours
Leading Sales Organization: Sales force motivation, Designing & Administering, Sales force compensation plans, Designing incentives and contests, Sales forecasting, Sales budget, Sales quota, Sales territory, Building sales reporting mechanism and monitoring, Sales force productivity, Sales force appraisal.					
UNIT-4	Introduction to retailing				08 Hours
Introduction, Meaning of Retailing, Economic Significance of Retailing, Product Retailing vs. Service Retailing, evolution of retailing- global retailing scenario- Indian retail –emerging trends in retailing in India. Types of Retailers: Classification by Ownership – Independent Store, Chain stores, Franchise Stores, leased Departments, Cooperatives; Classification by Strategy – General Merchandise Retailers, Discount Stores, Specialty Stores, Off Price Retailers; Classification by Product Line – Department stores, Supermarkets, Hypermarkets, Convenience Stores, Services retailing.					
UNIT-5	Retail Market Strategy				08 Hours
Retail Marketing Strategy: differentiation, growth strategy, strategic retail planning process. Retail Location & site selection Strategy: Types of retail locations, Steps involved in choosing a retail location, Methods of evaluating a trading area. Retail store layout & visual merchandising: Store planning, Store Design and the retailing mix, Space mix, effective space management, Store layout – circulation plan, Floor Space management. Markups and Markdowns, Shrinkage in merchandise management					
Course outcome: At the end of course, the student will be able to:					
CO1	Students will develop knowledge, understanding and skills in Sales force				(Understand) K2

	management.	
CO2	Acquainted with better understanding of implementation of sales management strategies.	(Analyse) K4
CO3	Develop analytical skills for effective decision alternatives in sales management problems	(Create) K6
CO4	Develop the knowledge, understanding and skills in retail management and how to manage Store and non-store retailing.	(Apply) K3
CO5	Understand how to develop marketing mix strategies for retail business.	(Analyse) K4

MBA SECOND YEAR

Course Code	AMBAMK0412	L	T	P	Credit
Course Title	Marketing Analytics	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40	
1	Understand the basic concepts of Marketing Analytics				
2	Study various tools to have marketing insights in various marketing areas through empirical data				
3	Interpret the marketing data for effective marketing decision making				
4	To draw inferences from data in order to answer descriptive, predictive, and prescriptive questions relevant to marketing managers				
5	Enable students to use forecasting methods for decision making				
Pre-requisites: Basic of Statistics and Marketing					
Course Contents / Syllabus					
UNIT-I	Introduction to Marketing Analytics				08 Hours
Meaning, characteristics, advantages and disadvantages of marketing analytics, Market data sources (Primary and Secondary). The new realities of marketing decision making Market Sizing: Data sources, Stakeholders, Applications & Approaches (Top-down and Bottom-up)					
UNIT-II	Pricing Analytics				08 Hours
Estimating Demand Curve: Estimating Linear and Power Demand Curves, Optimize Pricing, Incorporating Complementary Products, Using Pricing subjectively to estimate Demand Curves, Pricing Multiple Products, Price Bundling & Nonlinear Pricing: Pure Bundling & Mixed Bundling, Determine Optimal Bundling Pricing, Profit Maximizing strategies using Nonlinear Pricing Strategies, Price Skimming & Sales					
UNIT-III	Customer Analytics				10 Hours
Segmentation and Targeting: The segmentation-targeting-positioning (STP) framework, Segmentation, The concept of market segmentation, Managing the segmentation process, Deriving market segments and describing the segments -Cluster analysis, Discriminant analysis, Targeting, The concept of product positioning, Conducting a positioning study, Perceptual mapping using principal components analysis, Incorporating preferences into perceptual maps. Customer Lifetime Value: Concept, Basic Customer Value, Measuring Customer Lifetime value, Estimating Chance that customer is still active, Using Customer Value to value a business					
UNIT-IV	Retailing and Advertising Analytics				6 Hours
Market Basket analysis: Computing two way and three way lift Allocating Retail Space and Sales Resources: Identifying the sales to marketing effort relationship & its modeling, optimizing sales effort Advertising Analysis: Measuring the Effectiveness of Advertising, Optimizing advertising, Pay per Click (PPC) Online Advertising					
UNIT-V	Sales Forecasting & Conjoint Analysis				08 Hours
Regression model to forecast sales, Modeling trend and seasonality; Ratio to moving average forecasting method, Using S curves to Forecast Sales of a New Product Conjoint analysis: Conjoint analysis as a decompositional preference model, Steps in conjoint analysis, Uses of conjoint analysis.					
Course outcome: At the end of course, the student will be able to:					

CO 1	Understand basic concepts of marketing analytics.	Understanding (K2)
CO 2	Analyze the effects of pricing analytics on business decisions	Analyze (K4)
CO 3	Understand and apply customers analytics for marketing decisions	Analyze (K4)
CO 4	Understand retailing and advertising analytics	Understanding (K2)
CO 5	Understand and apply forecasting methods for decision making	Analyze (K4)

Text books

1. Marketing Analytics: Data-Driven Techniques with Microsoft Excel by Wayne L Winston © 2014 Wiley India Pvt. Ltd.
2. Marketing Analytics: Strategic Models and Metrics by Stephan Sorger© 2013 Create Space Publishing

Reference Books

1. Marketing Engineering and Analytics by Gary Lilen, Arvind Rangaswamy, and Arnaud De Bruyn© 2017 Decision Pro, Inc.
2. Fundamentals of Business Analytics by R N Prasad and Seems Acharya, Wiley Publisher
3. Marketing Analytics by Moutusy Maity and Pavan Kumar Gurazada, Oxford Higher Education
4. Digital Marketing Analytics by Chuck Hemann and Ken Burbary, Pearson Education

MBA SECOND YEAR					
Course Code	AMBAMK0413	L	T	P	Credit
Course Title	Marketing of Services	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Develop an understanding of the basic concepts and issues in service marketing.				
2	Build a working service marketing vocabulary so as to understand and discuss marketing concepts in business settings.				
3	Learn about key characteristics of service and service processes, customer service experiences, the role of internal stakeholders in service delivery, and organizational challenges of managing service.				
4	Strengthen the ability to justify and support decisions through information Acquisition and management.				
5	Provide an understanding of how service customers determine value in a service exchange and how this translates into a satisfied customer base.				
Pre-requisites: Having an understanding of Basics of marketing concepts and its models.					
Course Contents / Syllabus					
UNIT-I	Introduction To Services Marketing				08 Hours
Introduction To Services Marketing. Introduction: Definition, Characteristics and Classification of Services, Difference between Product and Services Marketing, Paradigms in Services Marketing, Present Marketing Environment; Services Marketing Mix: Understanding the 7 P's, Strategies for Services Marketing: Segmentation, Targeting & Positioning, Differentiation.					
UNIT-II	Understanding Consumer Behavior and Service				08 Hours
Understanding Consumer Behavior and Service Design Understanding Consumer Behavior: Services vis-à-vis goods, Consumer Behavior in Services, Customer Expectations and Perceptions of Services – Evaluation of services. Service Development Design & Standards: New Service Development Process – Basic service to potential service, Customer Defined Service Standards, Demand and Capacity Management.					
UNIT-III	Delivering, Pricing and Managing Service Promise				08 Hours
Delivering, Pricing and Managing Service Promise, Delivering Services: Role of Employees and Customers in service delivery; Service Product and Operation, Role of Employees and Customers in Service Delivery, Pricing of Services , Promotions and Services capes in Services Role of Intermediaries, Service process – Blue printing – Physical evidence. Pricing of Services: Pricing Considerations and Strategies.					
UNIT-IV	Service Performance				08 Hours
Service Performance. Evaluating Success of Service Offering: Service quality and measurement, Complaint handling, Recovery management, Service Guarantees. Role of CRM, the Gaps Model of Service Quality.					
UNIT-V	Overview Of Current Trends In Service Industries				08 Hours
Overview Of Current Trends In Service Industries, Understanding of Current Trends in Service Industries: Financial, Hospitality, Health, Telecom, Consultancy, Logistics, Education, NGO, Public Utilities, ITES (IT enabled Services), Travel & Tourism, e-Services and Professional Services.					
Course outcome: At the end of course, the student will be able TO:					
CO 1	Understand and explain the nature and scope of services marketing				Understand (K2)

CO 2	Use critical analysis to service excellence; perceive service shortcomings in reference to ingredients to create	Create (K3)
CO 3	Be able to identify critical issues related to service design, such as identifying and managing customer service experience, expectations, perceptions	Apply (K4)
CO 4	Provide a theoretical and practical basis for assessing service performance using company	Apply (K3)
CO 5	Identify and discuss characteristics and challenges of managing service firms in the modern world	Apply (K2)

Text books

1. Services Marketing Text and Cases, Vinnie Jauhari & Kirti Dutta, Oxford University Press.
2. Services Marketing, Zeithaml Valerie and Mary Jo Bitner, Gremler & Pandit, Tata McGraw Hill.

Reference Books

1. Services Marketing, Lovelock, Christopher. Prentice Hall.
2. Services Marketing, Nargundkar, Rajendra. Tata McGraw Hill
3. The Essence of Services Marketing, Adrian Payne. PHI.
4. Services Marketing, Ravi Shankar. Excel Publishing

MBA SECOND YEAR						
Course Code	AMBABI0411	L	T	P	Credit	
Course Title	Cyber Security	3	1	0	4	
Course objective: Objective of this course is to:					Duration:40 Hours	
1	Understand various types of threats to information system.					
2	Learn threats and risks within context of the cyber security.					
3	Have an overview of cyber laws					
4	Understand different types of ethical hacking .					
Course Contents / Syllabus						
UNIT-I	Introduction to Cyber Security				8 Hours	
Introduction : Introduction to information systems, Types of information Systems, Development of Information Systems, Introduction to information security, Need for Information security, Threats to Information Systems, Information Assurance, Cyber Security, and Security Risk Analysis.						
UNIT-II	Security Threat Management				8 Hours	
Application security (Database, E-mail and Internet), Data Security Considerations-Backups, Archival Storage and Disposal of Data, Security Technology-Firewall and VPNs, Intrusion Detection, Access Control. Security Threats -Viruses, Worms, Trojan Horse, Bombs, Trapdoors, Spoofs, E-mail viruses, Macro viruses, Malicious Software, Network and Denial of Services Attack, Security Threats to E-Commerce-Electronic Payment System, e- Cash, Credit/Debit Cards. Digital Signature, public Key Cryptography.						
UNIT-III	Security Elements				8 Hours	
Security Elements: Authorization and Authentication - types, policies and techniques – Security certification , Security monitoring and Auditing - Security Requirements Specifications – Security Policies and Procedures, Firewalls, IDS, Log Files, Honey Pots. Developing Secure Information Systems, Application Development Security, Information Security Governance & Risk Management, Security Architecture & Design Security Issues in Hardware, Data Storage & Downloadable Devices, Physical Security of IT Assets, Access Control, CCTV and intrusion Detection Systems, Backup Security Measures.						
UNIT-IV	Security Policies				8 Hours	
Security Policies: Why Policies should be developed, WWW policies, Email Security policies, Policy Review Process-Corporate policies-Sample Security Policies, Publishing and Notification Requirement of the Policies. Information Security Standards -ISO, IT Act, Copyright Act, Patent Law, IPR. Cyber Laws in India; IT Act 2000 Provisions, Intellectual Property Law: Copy Right Law, Software License, Semiconductor Law and Patent Law. Recent amendments by the IT (Amendment Act) 2008, Act Section 66 (A, B, C, D, E, F), IT ActSection67(A,B,C) , IPR Issues:, Copyright Issues in Cyberspace, Trademark Issues in Cyberspace, Patent Issues , industrial design, Geographical indications, Plant Varieties, Information Technology and Cyber Crimes.						
UNIT-V	Ethical Hacking				8 Hours	

<p>Ethical Hacking: Introduction, Networking & Basics, Foot Printing, Google Hacking, Scanning, Windows Hacking, Linux Hacking, Denial of Service, Sniffer, Social Engineering, Wireless Hacking, Firewall & Honey Pots, Cryptography, IDS & IPS, Penetration Testing, Session Hijacking, Hacking Web Servers, Reverse Engineering, Email Hacking, Incident Handling & Response, Bluetooth Hacking, Mobile Phone Hacking Basic ethical hacking tools and usage of these tools in a professional environment.</p>		
<p>Course outcome: At the end of course, the student will be able to:</p>		
CO 1	Understand the cyber security needs of an organization	(Understand) K2
CO 2	Understand different types of security threats and their impact into to e - commerce	(Understand) K2
CO 3	Understand security policies and protocols to implement such policies.	(Apply) K3
CO 4	Apply policies and procedures and cyber laws to manage Privacy Issues.	(Analyze) K4
CO 5	Understand different types of ethical hacking and their impact in real world.	(Apply) K3
<p>Text books</p>		
<p>1. NimaGodbole and SunitBelpure , Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives, Wiley- India</p>		
<p>2. B. B. Gupta ,D.P.Agrawal , Haoxing Wang. Computer and Cyber Security : Principles, Algorithm , Applications and Perspectives, CRC Press, ISBN 9780815371335 , 2018</p>		
<p>Reference Books</p>		
<p>1. Swiderski, Frank and Syndex, “Threat Modeling”, Microsoft Press, 2004.</p>		
<p>2. William Stallings and Lawrie Brown, “Computer Security: Principles and Practice”, Prentice Hall, 2008.</p>		
<p>3. Joseph M Kizza, “ComSwputer Network Security”, Springer Verlag, 2005</p>		
<p>4. Thomas Calabres and Tom Calabrese, “Information Security Intelligence: Cryptographic Principles & Application”, Thomson Delmar Learning, 2004.</p>		
<p>5. Michael Gregg, "Certified Ethical Hacker (CEH) Cert Guide", Pearson India, 2014</p>		

MBA SECOND YEAR					
Course Code	AMBABI0412	L	T	P	Credit
Course Title	Database Technology	3	1	0	4
Course objective: Objective of this course is to:				Duration:40 Hours	
1	Understand the basic concepts and the applications of database systems.				
2	Understand the basic concepts of RDBMS				
3	Master the basics of SQL and construct queries using SQL & Familiar with the basic issues of transaction processing				
4	Understand the concept of data warehousing and recent trends.				
Course Contents / Syllabus					
UNIT-I	Introduction to Databases.	8 Hours			
Database Management System: Introduction, Organization and Components of Database Management Systems, Advantages of DBMS. Database Models: Relational Database Model, Network Database Model, Hierarchical Database Model, Semantic Database Model.					
UNIT-II	Relational Database Design	8 Hours			
Relational Database Design: Concepts, E-R Diagram, ACID property, Integrity Constraints, Functional dependencies, Concept of Normalization, Physical Database Design, Decomposition of Relation Schema, Relational model, database schema, relational algebra, outer join and manipulation of databases.					
UNIT-III	Tuple Relational Calculus	8 Hours			
Tuple relational calculus: Example queries, formal definitions and safety of expressions; SQL: Query processing and optimization, set operations, aggregate functions, DDL, DML and views, comparison of queries in relational algebra, SQL, tuple relation calculus and domain relation calculus. Serializability and testing for serializability, concurrency control schemes, lock-based protocols, two-phase locking protocols, graph-based protocols, time stamp-based protocols, deadlocks.					
UNIT-IV	Data Warehousing	8 Hours			
Data Warehousing: Overview, Definition, Data Warehousing Components, building a Data Warehouse, Mapping the Data Warehouse to a Multiprocessor Architecture, Difference between Database System and Data Warehouse, Multi-Dimensional Data Model, Data Cubes, Stars, Snow Flakes, Fact Constellations, Concept hierarchy, Process Architecture, 3 Tier Architecture, Data Scrubbing, Data Marting.					
UNIT-V	Data Management System& Trends	8 Hours			
Data Management: Recovery systems, log-based recovery, deferred and immediate database modification, object oriented database design. Concept of NoSQL databases, Brief History of NoSQL Databases, Features of NoSQL, Types of NoSQL Databases (MongoDb), CAP Theorem, Eventual Consistency, Advantages of NoSQL.					
Course outcome: At the end of course, the student will be able to have					
CO1	Knowledge about Database Technology				(Understand) K2
CO2	Understanding the business application of Database Technology				(Apply) K3
CO 3	Formulate SQL queries on the data & Understand the concepts of transactions, their processing				(Create) K6
CO4	Knowledge and usage of data warehousing & Data Model				(Apply) K3

CO5	Knowledge on Unstructured Database and its application	(Apply) K3
Text books		
<ol style="list-style-type: none"> 1. Korth, Silbertz, Sudarshan," Database Concepts", McGraw Hill 2. Data base System Concepts, A. Silberschatz, Henry. F. Korth, S. Sudarshan, McGraw Hill Education(India) Private Limited 1, 6th edition 3. RAMAKRISHNAN"Database Management Systems",McGraw Hill 		
Reference Books		
<ol style="list-style-type: none"> 1. Leon &Leon,"Database Management Systems", Vikas Publishing House 2. Bipin C. Desai, " An Introduction to Database Systems", Gagotia Publications 3. Majumdar & Bhattacharya, "Database Management System", TMH 		

MBA SECOND YEAR					
Course Code	AMBABI0413	L	T	P	Credit
Course Title	System Analysis & Design	3	1	0	4
Course objective: Objective of this course is to:				Duration: 40 Hours	
1	Provide knowledge of different concepts of system analysis and design so that students will be able to develop information systems using different methodologies, tools , techniques and approaches.				
2	Acquainting the students with tools techniques of planning, analyzing, designing, implementing and maintaining Information system				
3	Understand techniques and tools for data process modeling , entity – relationship diagrams & physical database diagrams				
4	Understand the project monitoring tools & techniques				
Course Contents / Syllabus					
UNIT-I	System Engineering Ethics				8 Hours
<p>Systems Ethics- Over View of System Analysis and Design, Business System Concepts, Characteristics of a System, Elements of a System, Types of Systems, Systems Models, Categories of Information & Information Management System. SAD/SE state ofthe art, gaps, industry focus and research.</p> <p>System Development Life Cycle: Investigation, Analysis, Design, Implementation, Post Implementation Review and Maintenance.V Process Model, Introduction to Agile Methodology, Iterative-incremental process models – RUP and Scrum comparative analysis.</p>					
UNIT-II	Specifications& Structured Analysis				8 Hours
<p>RequirementSpecification: System Requirement Specifications, Requirement Specification Process: Elicitation, Analysis, Documentation, Review and Management of User Needs, concepts, methods and standards.Feasibility Analysis:Feasibility Study, Steps in Feasibility Analysis, Feasibility Report. Information Modelling, IEEE Standards for SRS.</p> <p>Structured Analysis:Data Flow Diagrams, <i>Entity Relationship Diagrams,Use case Diagram, Activity Diagram, Class Diagram</i>, Decision Tables, Data Dictionary; Process Modeling: Structured English, Decision Tree & Decision Table, Object-Oriented Analysis & Design (OOD). Tools (EA & Star UML).</p>					
UNIT-III	Project Organization & Scheduling				8 Hours
<p>Systems Planning and Investigation: Basis for Planning in Systems Analysis, Dimensions of Planning, Initial Investigation, Needs Identification. Project schedule, Scheduling Objectives, Building the project schedule, Scheduling terminology and techniques, Network Diagrams: PERT, CPM, Bar Charts: Milestone Charts, Gantt Charts.</p>					
UNIT-IV	System Implementation				8 Hours
<p>System Implementation: Implementation Plan, Hardware Selection, Determining size and capacity requirements, Computer evaluation and measurement, Maintenance and Support, Vendor Selection, Software Selection, Criteria for Software Selection, Performance Evaluation.</p>					
UNIT-V	Software Quality & Trends				8 Hours
<p>Software Quality Assurance (SQA): Quality concepts, Software quality assurance, SQA activities, Formal approaches to SQA; Statistical software quality assurance; CMM, The ISO 9000 Standard, Six sigma.</p> <p>Types of Review: Inspections, Desk checks, Walkthroughs, Code Reviews, Pair Programming.</p> <p>Latest Trends in SAD: Cloud & DevOps.</p>					
Course outcome: At the end of course, the student will be able to:					

CO 1	Understand the principles and tools of system analysis and design & the basic concept of SDLC	(Understand) K2
CO 2	Apply appropriate Information systems tools & Techniques to create solutions to information systems problems.	(Apply) K3
CO 3	Learn & Understand the basic concept of Project Scheduling , PERT , CPM and Bar Chart..	(Evaluate) K4
CO 4	Llearn and evaluate software implementation with a clear understanding on quality assurance and quality framework.	(Evaluate) K4
CO 5	Learn types of Project review and new trends in SAD	(Apply) K3

Text books

1. I.T.Haryszkiewicz, Introduction of System Analysis and Design, Pearson Education, (PHI) 1998.
2. V.Rajaraman, Analysis and Design of Information System, Pearson Education, 1991.
